

bariatric training aid

Our bariatric training aid is a 'fat suit' which has been designed to recreate some of the problems which can occur when treating and caring for a bariatric patient.

When worn by a carer or nurse, it is an ideal tool to show staff the different techniques used when a bariatric patient is admitted.

Features	Benefits
One size fits all	Can be worn by anybody to demonstrate how it feels to be a bariatric patient.
Realistic weight distribution	Accurate weight movement when practicing manual handling techniques
