

Bari Foam+

pressure relieving bariatric
foam mattress

Width adjustable from
915mm (36") - 1220mm
(48") using foam inserts

Enclosed in PU coated
box cover

The Bari Foam+ mattress is an alternative to our dynamic air mattress and provides pressure relief for medium risk patients.

The mattress is unique with its width adjustable feature to compliment the aurum bariatric bed. Width adjustment is achieved through two foam extension inserts which slot either side of the mattress when the bed is extended. These foam extension pieces also provide a more solid edge for patient ingress and egress.

The mattress is suitable for patients up to 414kg (65st) and is made up of a series of combustion modified foam to give the mattress its pressure relieving qualities.
