

# limb support

height adjustable

## Key features / spec

20 disposable covers included which enhances infection control

15kg(2.4st) swl can support the majority of patient's limbs

Height adjustable which can suit the patients height

The limb support is a lightweight and portable alternative to our larger limb support which is ideal for staff working in the community.

It is height adjustable to ensure the limb is always at a suitable height for the carer to work on with causing unnecessary strain.

The disposable slings promote infection control and prevent cross-infection when being used with a number of patients.

Available for Purchase
