

# Disposable Flat Slide Sheets with Handles

A patient specific/disposable flat slide sheet with handles that allows the health professional to manoeuvre the patient in a variety of ways, effortlessly and with ease.

This excellent range is produced from an advanced technical fabric that is smooth, soft and quiet, yet very strong and robust. This means that you can move the people in your care with greater ease and safety.

Handles are stitched securely down both sides which make the sheets suitable for sitting people forward, transferring from surface to surface etc. You can also loop our straps through them to assist with the transferring manoeuvre.

**Uses:**

Repositioning up and down in beds/trolleys, turning, transferring

**Used by:**

All areas of healthcare involved in the repositioning of people, including Emergency Services and Operating Theatres
