

Webbing Rope Ladder

small patient aid

Easy to attach

Coloured rungs assist with positioning in bed

A wonderful, easy-to-attach, easy-to-use product that helps people either sit up or lie down independently and in a controlled manner.

The multi-coloured functional webbing ladder is easy to attach to a bed. With no knots or ties to worry about – just loop it through itself and then use the different coloured rungs to help assist with positioning in a bed. Ideal for patients wanting to maintain independence, those who just need a little more help or patients going through a process of rehabilitation.

Features	Benefits
